

# SAFETY EVERY DAY

## Chemicals at Home

**SCHÜTZ**

### Quick Guide for Chemical Safety at Home:

#### What You Need to Know

- **Common Chemicals at Home:** Cleaning products, paints, pesticides, etc.
- **Look for Warnings:** Be aware of labels that say “Danger,” “Toxic,” or “Flammable.”

#### How to Stay Safe

- **Read Labels:** Always follow the instructions on the product.
- **Store Safely:** Keep chemicals locked up and away from kids and pets.
- **Use Protective Gear:** Wear gloves or masks when using strong chemicals.

#### Disposal Tips

- **Don't Mix Chemicals:** Mixing can be dangerous.
- **Dispose Properly:** Check local guidelines for hazardous waste disposal.

#### What to Do in an Emergency

- **If You Spill or Get Exposed:** Rinse the area with water and seek help if needed.
- **Have Contacts Ready:** Keep poison control numbers handy.

#### Wrap Up

- Check your home for harmful chemicals.
- Stay safe and ask questions if you're unsure!

### 6 SAFETY TIPS FOR CHEMICAL HANDLING AT HOME

1

#### READ THE INSTRUCTIONS

Make sure to read the label first and follow the instructions while using it.

2

#### KEEP AWAY FROM CHILDREN

Keep chemical products in a locked cabinet out of the reach of children and avoid from being noticed by them

3

#### USE PROTECTIVE EQUIPMENT

Make sure to have protective equipment such as gloves or a face mask, and work in a well ventilated area..

4

#### PUT A CLEAR LABELLING

Keep chemicals in their original packaging or labelled them clearly and do not mix with other products

5

#### CHECK REGULARLY

Check regularly that storage containers are not damaged or leaking after a long time being stored.

6

#### PROPER CHEMICAL DISPOSAL

Some household chemicals must not be thrown into regular rubbish and do not throw them in the toilet or down the drain
